Profile Summary

Computer Science undergraduate at KIIT with experience in web development and machine learning projects. Strong foundation in data structures and algorithms, object-oriented programming, database management systems, and computer networks. Experienced in developing scalable applications and working with modern software development and AI/ML concepts.

Education

Kalinga Institute of Industrial Technology (KIIT)

B.Tech in Computer Science — CGPA: 8.88

2023 – 2027

Bhubaneswar, Odisha

Saraswati Sishu Vidya Mandir

Class 12th — 79.5%

2023

Odisha

DAV Public School

Class 10th — 93%

2021

Odisha

Projects

Weather App | HTML, CSS, JavaScript, API

2026

- Project Link: Weather App
- Built a weather forecasting application using real-time weather API integration.
- Displayed live temperature, humidity, and weather conditions dynamically.
- Designed responsive UI with interactive search functionality.

Snake Game | HTML, CSS, JavaScript

2026

- Project Link: Snake Game
- Developed a classic Snake Game using JavaScript game logic and DOM manipulation.
- Implemented score tracking, collision detection, and keyboard controls.
- Enhanced frontend development and problem-solving skills through game mechanics.

Diabetes Detection System | Python, Machine Learning Algorithm SVM

2025

- Project Link: Diabetes Detection
- Built a machine learning model to predict diabetes based on health parameters.
- Performed data preprocessing and model training using healthcare datasets.
- Focused on improving prediction accuracy and understanding ML workflows.

Technical Skills

Programming Languages: C++, JavaScript

Frontend Technologies: HTML, CSS, React.js

Backend Basics: Node.js, Express.js

Database: MongoDB

Libraries: NumPy, Pandas, Matplotlib, Seaborn

Tools & Platforms: Git, GitHub, Docker, VS Code

Core Concepts: Data Structures & Algorithms, OOPs, DBMS, Computer Networks

Areas of Interest: Web Development, AI/ML Basics

Leadership

Thales Hackathon

November , 2026

Team Leader of Tech Blenders

KIIT University

- Led a team during the Thales Hackathon to develop and present an innovative technical solution.
- Collaborated with team members on problem-solving, project planning, and implementation.
- Managed task distribution and coordinated project development within limited time constraints.
